

Freddy Ramírez Rede

JUNIOR QA TESTER | MANUAL QA | FUNCTIONAL TESTING | API TESTING | SQL | JIRA

Mérida, Yucatán, México | freddyrmzrede@gmail.com | +52 999 506 4391 | www.linkedin.com/in/freddy-ramírez-rede-8b4778283

PROFESSIONAL PROFILE

Manual QA Tester with specialized Quality Assurance training and hands-on experience in web and mobile functional testing, test case design and execution, requirements analysis, API testing, and defect documentation in Jira. Database and SQL knowledge for querying and validating information, including SELECT, WHERE, and JOIN. Knowledge of Agile/Scrum, STLC, and functional and non-functional testing covering compatibility, interruptions, orientation, connectivity, and permissions. Experience with Postman, REST, HTTP, JSON, Android Studio, Termius, Cygwin, GitHub, Figma, and front-end web technologies. Currently expanding into QA Automation and Python.

TECHNICAL SKILLS

Testing: Functional testing | Non-functional testing: compatibility, interruptions, orientation, connectivity, permissions | Web testing | Mobile testing | API / REST | Positive and negative testing | Test case design and execution | Bug reporting and tracking

Test design: Requirements analysis | Equivalence classes | Boundary values | Atomic decomposition | Test scenarios | Mind maps | Flowcharts

Methodologies: Agile / Scrum | Sprints | STLC | Prioritization and task tracking | ISTQB Foundation good-practice model

Databases: SQL | SELECT | WHERE | JOIN | GROUP BY | HAVING | CASE | Data querying and validation

Tools: Postman | Jira | GitHub | Android Studio | Termius | Cygwin | Google Sheets | Google Docs | Figma | Adobe Illustrator

Web / Front-end: HTML | CSS | JavaScript | Vite | Responsive Web Design | Dark / Light mode | ES / EN localization | LocalStorage | SVG / animated icons | GitHub Pages | GitHub Actions

Technologies / OS: REST | HTTP | JSON | Python | Git | Windows | macOS | Linux | iOS | Android

TECHNICAL PROJECTS

Urban.Lunch — Mobile functional testing | **MOBILE TESTING**

Designed and executed 86 test cases for the complete flow of a mobile food-ordering application across three Android devices with different resolutions. Tested incoming calls, orientation changes, connection loss, and permissions. Identified and documented 7 defects related to UI, information retention, delivery times, order delivery, and permissions.

Skills: Functional testing | Mobile testing | Android Studio | Test case design | Jira | Compatibility | Interruptions | Bug reporting

Evidence: [View evidence](#)

Urban Routes — REST API testing | **API TESTING**

Designed and executed test cases to validate a REST endpoint through POST requests, parameters, JSON bodies, HTTP codes, required fields, data types, limits, and error handling. Identified and documented defects related to incorrect validations and unexpected responses.

Skills: Postman | API Testing | REST | HTTP | JSON | Jira | Positive and negative testing

Evidence: [View evidence](#)

Urban Routes — Web functional testing | **FUNCTIONAL TESTING**

Designed and executed functional tests for the booking flow, payment method, validations, price, timer, pop-ups, and cancellation. Compared the interface with Figma designs, tested in Chrome and Firefox at different resolutions, and documented defects in Jira.

Skills: Functional testing | Jira | Figma | Chrome | Firefox | DevTools | Test design

Evidence: [View evidence](#)

Urban Routes — Test design | **TEST DESIGN**

Analyzed Urban Routes requirements and designed equivalence classes and boundary values for different input fields, distances, and schedules. Created test cases to validate travel time and cost calculations, plus a mind map, atomic decomposition, and flowchart.

Skills: Requirements analysis | Equivalence classes | Boundary values | Test design | Atomic decomposition | Mind maps | Flowcharts

Evidence: [View evidence](#)

TECHNICAL PROJECTS (CONTINUED)

Urban Routes — Map functional testing | FUNCTIONAL TESTING

Designed and executed 24 test cases to validate map navigation, zoom, address search, markers, 3D objects, display modes, and Street View. Identified and documented 9 defects with expected result, actual result, and severity.

Skills: Functional testing | Test cases | Jira | Requirements analysis | Bug reporting

Evidence: [View evidence](#)

Chicago Taxi — SQL and data analysis | SQL · DATABASE TESTING

Queried and analyzed a taxi-service database using SELECT, COUNT, GROUP BY, HAVING, CASE, date filters, and INNER JOIN to analyze cars, companies, weather conditions, and trips. Validated project results, including the documented count of 5,529 cars.

Skills: SQL | SELECT | COUNT | GROUP BY | HAVING | CASE | INNER JOIN | Data validation

Evidence: [View evidence](#)

Python test automation | IN PROGRESS · QA AUTOMATION

Project in progress focused on learning and applying Python for test automation within Quality Assurance, building practical programming and automation skills to complement Manual QA experience.

Skills: Python | QA Automation | Automated Testing | Testing

QA Portfolio Website | WEB / FRONT-END

Built and iterated a bilingual QA portfolio using HTML, CSS, JavaScript, and Vite. Implemented responsive layouts, dark / light theme switching, ES / EN localization, localStorage preferences, custom language controls, scroll interactions, animated SVG social icons, and GitHub Pages deployment.

Skills: HTML | CSS | JavaScript | Vite | Responsive design | ES / EN localization | Dark / light mode | LocalStorage | SVG animations (Its Hover) | GitHub Pages | GitHub Actions

PROFESSIONAL EXPERIENCE

Momentec Brands | Sportswear design and production company | 2019–2026

Workflow Lead | 2024–2026

- Led task assignment, prioritization, and tracking through Jira; coordinated artists, deliverables, and blockers.
- Managed priorities and collaborated with different areas to maintain process traceability and efficiency.

Workflow | 2021–2024

- Managed and distributed tasks among artists using Jira, tracking statuses, priorities, and delivery dates.
- Coordinated requests and resolved blockers to keep production flow moving.

Graphic Designer | 2019–2021

- Designed and reviewed sportswear graphics using Adobe Illustrator according to production specifications and requirements.

GNP | Insurance Agent | 2026–Present

- Client support and follow-up, request management, documentation, and professional communication.

EDUCATION

QA Engineer Bootcamp - TripleTen | 2026 · In progress

Computational Robotics Engineering - Universidad Politécnica de Yucatán | University studies not completed

Programming Technician - CBTis 120 | Upper secondary education

Languages: Native Spanish | Intermediate English, stronger written proficiency
